Hydrophobic Agent added in base Mix and Face Mix.
Proshield Products have reduced penetration from all sides of the pavers. All products are introduced after Wet side Film coating technology.

WHY PROSHIELD

- Impregnated coating system.
- Reduction of Water absorption
- Durability
- Reducing efflorescence
- Resistance against Oil and other substances
- UV resistance
- Scratch Resistance
- Cleanability
- Over coat-able
- Gabbro Aggregates on face and base
- Environmentally friendly concept.
- Products are water based added 200-250 ml per sqm.
- State of the art application technology.

Hydrophobic Agent added in base Mix and Face Mix. Proshield Products have reduced penetration from all sides of the pavers. All products are introduced after Wet side Film coating technology.
